Hiring Manager

Rubrik

Dear Hiring Team at Rubrik,

I'm excited to apply for the engineering role focused on automation, infrastructure, and cloud optimization at Rubrik. I'm currently pursuing my Master's in Computer Science at Texas A&M University and bring over three years of experience as a Software Engineer at JP Morgan Chase, where I built and operated scalable, cloud-native systems.

In my role, I worked extensively with **AWS, Docker, and Kubernetes**, and contributed to **cloud migrations and infrastructure modernization** efforts that improved scalability and reduced costs. I have hands-on experience with **Infrastructure-as-Code using Terraform**, building **CI/CD pipelines**, and designing systems with a focus on **automation, reliability, and operational efficiency**.

I've also been involved in identifying **cost optimization opportunities**, including improving resource utilization and streamlining architectures to reduce overhead while maintaining performance. I enjoy solving problems at the intersection of **infrastructure, automation, and scalability**, and I'm particularly excited about Rubrik's focus on building robust, efficient cloud platforms.

I'd love the opportunity to contribute to Rubrik's infrastructure and platform engineering efforts.

Sincerely,

Hitha Magadi Vijayanand
