Hiring Manager

Rubrik

Dear Hiring Team at Rubrik,

I'm excited to apply for the Software Engineer - Cloud Infrastructure role at Rubrik. I'm currently pursuing my Master's in Computer Science at Texas A&M University and bring over three years of experience as a Software Engineer at JP Morgan Chase, where I built and operated scalable, cloud-native systems.

In my role, I worked extensively with **AWS, Docker, and Kubernetes**, and contributed to **cloud migrations and infrastructure modernization** efforts that improved scalability and reduced costs. I have hands-on experience with **Infrastructure-as-Code using Terraform**, building **CI/CD pipelines**, and designing systems with a focus on **automation, reliability, and performance**.

I've also worked on **event-driven systems handling high-throughput workloads**, and collaborated across teams to ensure **system stability and operational efficiency**. I enjoy solving challenges at the intersection of **infrastructure, distributed systems, and cloud operations**, and I'm particularly excited about building platforms that are both **scalable and developer-friendly**.

Thank you for your time and consideration. I'd love the opportunity to contribute to Rubrik's cloud infrastructure and platform engineering efforts.

Sincerely,

Hitha Magadi Vijayanand
